

S.N. 10/726,176
Art Unit: 3643

4.

REMARKS

Claims 1 to 3 are in the case.

With this amendment, Applicant has amended Claim 1 to delete the recitation that the first and second linkages are independent from each other.

Claim 2 has also been amended to make the correction most helpfully suggested by the Examiner.

It is believed that these changes now put the application in order for allowance.

Applicant notes the Examiner's comments in the paragraph spanning Pages 1 and 2 of the Office Action. In this regard, it is believed that the claim correctly defines the operational components. It will be noted that, element 80 is connected to third lever 20 which permits the rotation of lever 20.

It is now believed this application is in order for allowance, and such action is respectfully solicited.

Respectfully,

Eric Fincham
